SSC – 71 %

## PROJECTS

- **Online Bus Ticket Reservation:**

In this project I used HTML & CSS As front-end & Asp.Net as Backend technology.

The purpose of Online Bus Ticketing System is to automate the existing manual system by the help of computerized equipment and full-fledge computer software, fulfilling their requirement, so that their valuable data/information can be stored for a longer period with easy accessing and manipulating of the same. The required software and hardware are easily available and easy to work

- **To-Do List:**

To-Do List allows user to list the task they want to perform save notes about some work, they can edit or delete those tasks by using edit and delete functionality.

Technologies: React Js, JavaScript, CSS3, HTML.
