SSC – 71 %

PROJECTS

• Online Bus Ticket Reservation (2019):

In this project I used HTML & CSS As front-end & Asp.Net as Backend technology.

The purpose of Online Bus Ticketing System is to automate the existing manual system by the help of computerized equipment and full-fledge computer software, fulfilling their requirement, so that their valuable data/information can be stored for a longer period with easy accessing and manipulating of the same. The required software and hardware are easily available and easy to work.

• To-Do List:

To-Do List allows user to list the task they want to perform save notes about some work, they can edit or delete those tasks by using edit and delete functionality.

Technologies: Reactjs, JavaScript, CSS3, HTML.

• Personal Portfolio:

A personal portfolio website is a professional website is a professional website that provides information about what you do, what services you may offer, and how to contact you or your company. Portfolio website are an easy way to promote yourself, your brand, or your business.

Technologies: JavaScript, CSS3, HTML.
